1.3 Single Cable Record

The 'Single Cable Record' window shows a single cable record

The 'Cable Schedule' window displays a form for entering cable details. At the top, it shows 'Number of Records/Cables :- 1666'. The form includes fields for 'Device Cable From', 'Origin Device Tag Number', 'Gland on Start', 'Cable', 'Gland on End', 'Cable Destination', 'Cable Sorting ID Number', and 'Destination Device Tag'. Below these are dropdown menus for 'Core', 'Type', 'Voltage', 'Cable A', 'Category', 'Est Lqth', 'Actual', and 'OD mm'. There are also fields for 'Rating kV', 'Load Amps', 'Load Factor', 'Pwr Factor kVar', 'Cost Centre', 'Date Entered', 'Date Complete', 'Test Results Meg Ohm', 'Earth Continuity Ohm', 'Termination Complete', 'Drum No.', and 'Date Modified'. A 'Comment' text area and a 'Name of Person Signing off on Cable' field are also present. The bottom of the window has a toolbar with buttons for 'Drawing', 'Edit', 'New', 'OK', 'Cancel', and 'Close'.

This window allows the user to display the contents of one cable only. This can be opened directly from Navigation Screen or the cable schedule Table by using the context menu in the Main Table.

The main purpose of this screen is to provide the user with Quality Assurance and access to the cable were initially installed, terminated tested, results, completion date and person signing off the cable

This button builds a drawing list so drawing numbers can be drag from the list to the Drawing fields.
